OBJECTIVE: To contribute creative ideas, work with top talent, and create cutting-edge mobile applications that change user experiences and propel technological growth, I'm looking for an outstanding app development internship from September to December 2023.

HIGHLIGHTS

- Proficient in Java and Swift app development for the iOS and Android platforms. A working knowledge of the Flutter framework for cross-platform development.
- Strong grasp of the UI/UX design principles for mobile devices, resulting in aesthetically pleasing and user-friendly interfaces. Able to seamlessly deliver user experiences while enhancing app functionality by integrating APIs and web services.
- Able to code, debug, and test effectively utilizing development tools like Xcode and Android Studio.
- Strong problem-solving abilities and the capacity to efficiently debug and address app-related difficulties.

EDUCATION

Mobile Solution Development

Conestoga College, City, ON

Jan 2023 – Apr 2024

Bachelor of Technology in Computer Engineering

Dharmsinh Desai University, Nadiad, India

CPI: 8.84/10

Aug 2019 – May 2022

PROJECT WORK

Kids – play and learn educational toolbox [Flutter, Dart, Google Firebase]

Dec 2020- Feb 2021

- Created a secure Android app for children's health and safety, complete with robust parental control. Engaging images and interactive functionality, such as word pronunciation and visual association, were implemented. Various visual categories such as fruits, vegetables, and transportation were successfully incorporated, creating an interesting and instructive experience.

EXPERIENCE

App developer - ThatsEnd Pvt. Ltd. - Surat

Apr 2022 – Dec 2022

- Participated in all phases of the Software Development Life Cycle (SDLC), demonstrating proficiency in requirements gathering, modelling, analysis, architectural design, prototyping, development, and testing.
- Completed technical specification documentation, including use cases, Class, Sequence, and Activity Diagrams, were created.
- Developed databases and designed new applications from the ground up, utilizing basic Flutter widgets/data structures. Core Dart classes and interfaces that are expertly designed using Collections and design patterns.
- Amazon Web Services (AWS) was used to publish and consume messages, while AWS Amplify was used to create sign-on capabilities. Created a validation framework for data quality checks, oversaw database schema design, and wrote SQL queries and Stored Procedures.
- Led continuous releases using GIT and Collaborate, ensuring efficient code quality through peer code reviews. Expertly managed deployment and release processes, as well as troubleshooting and supporting production issues to maintain business continuity.

Android App Development Summer Internship

Mar 2021 - Jun 2021

- Acquired broad knowledge of Android app programming, including widgets, services, event management, background tasks, image and video editing, establishing expertise as an intermediate Android developer.
